

## Recommendations

At the beginning, we would like to recommend Long Life Tomasz Żrebiec - a manufacturer of normobaric chambers. Our cooperation turned out to be reliable, efficient and timely.

We have been thinking about running a normobaric chamber commercially for a long time, due to the benefits of using oxygen therapy. In the search for a chamber manufacturer, the choice finally fell on Long Life. The employees and the owner showed understanding and an active attitude to our expectations. The chamber was made according to our guidelines with attention to every detail. Despite the difficult weather conditions, the manufacturer undertook to transport the chamber and set it up in order to complete the order on time. Currently, we are happy to run a well-functioning Normobaria Krynica Zdrój.

With all this in mind, if we were faced with the choice of a manufacturer of normobaric chambers again, we would certainly choose Long Life.

Kind regards
