

Rzeszów, 17.09.2020

Reference

Our company F.H.U Błysk Radosław Raś warmly recommends normobaric chambers produced by the LONG LIFE company with its registered office at ul. Trębackiej 11A, 38-420 Korczyna.

The chamber we ordered was made according to our requirements and with the precision of every detail. Long Life employees showed full availability and experience. It is worth noting that the Long Life company, after putting the normobaric chamber into use, offered us to install a new innovative component developed in the course of tests completely free of charge. Such an initiative is commendable, and the client has the feeling of being treated individually. Currently, we are happy to run a normobaric chamber in Krasne near Rzeszów, which works flawlessly.

High qualifications, proper organization of work, professionalism, commitment and technological awareness are the features that I can define Long Life with full responsibility.
